InduSoft Becomes a Solution Provider on MyPlant.com

HILTON HEAD ISLAND, SOUTH CAROLINA – March 13, 2000 - InduSoft Ltd. has become a solution provider on MyPlant.com. MyPlant.com, "the source for plant solutions", provides comprehensive resources, services, and knowledge-based solutions to process-industry professionals through an online community of software and equipment providers, consultants, academics, and engineering service firms.

InduSoft's Studio is a complete supervisory control, process monitoring, and operator interface software package for the Windows NT/2000 and CE environments. Studio includes such functions as an object-oriented database, math functions, report generation, archiving, alarms, batch recipes, PLC interfaces, remote I/O, serial and TCP/IP networking.

"We see MyPlant.com as a way to expand InduSoft's visibility to a broader customer base, as well as provide a simple way to purchase our product off the Web," said E. T. Roland, CEO and President for InduSoft. "MyPlant.com currently hosts 40,000 sessions a month, and that number has been growing by 50 percent each month, so it seemed a perfect place to showcase InduSoft's industrial automation solutions."

MyPlant.com was developed as an unbiased Internet community where professionals from all areas of process manufacturing could come to find complete solutions to solve plant problems and improve operational performance. Besides plant solutions, MyPlant.com provides members

with industry-specific news, features, and editorials; on-line seminars; and on-line access to specialty publications and career information. MyPlant.com membership is free. MyPlant.com is a Honeywell e-venture, with an equity stake from Microsoft.

MyPlant.com's goal is to create the world's leading independent e-hub for the manufacturing industries. "We provide a growing number of outstanding product offerings to our customers and we are pleased to have InduSoft join as a solution provider," stated Darron Smith, MyPlant.com Marketing Manager. "We're excited to have InduSoft as one of the first companies participating in our e-commerce capabilities."

About MyPlant.com

MyPlant.com (www.myplant.com) was created in 1999, in response to the process industries' need for easy access to resources and solutions. The MyPlant.com website brings together a wide range of knowledge-based solutions from a global community of consultants, software providers, equipment providers, academic professionals and engineering service firms into a single site focused on serving the industrial plant-centric customer. MyPlant.com creates value by lowering the cost of solution delivery through reduced search and transaction costs, and improved matching of buyers and vendors. Additional benefits of the MyPlant.com community include exchange of information and knowledge through industry news, editorials, on-line seminars, member surveys, and discussion groups.
