**For Immediate Release**

## ***Ready-To-Run CE SCADA Systems Announced By HMW Enterprises and InduSoft***

WAYNESBORO, PENNSYLVANIA – August 21, 2000 - HMW Enterprises and InduSoft today announced a joint marketing effort. They have agreed to make the HMW Series 2000 Windows CE Operator Stations and InduSoft CEView SCADA/HMI software available in pre-qualified packages through their joint sales channels. The combination is a ready-to-use and powerful combination of industrial automation hardware and software for Windows CE.

The HMW Series 2000 includes more than 18 models of TFT-touchscreen Operator Stations designed for SCADA/HMI applications. It uses the powerful Nimble Engine single board computer from Nimble Microsystems. Form factors include wall mount, rack mount, tilt/swivel stand, and stainless-steel housings. Standard sizes range from 10 inch displays up to 15 inch. All have two Ethernet ports with separate IP addresses and optional ports for all standard fieldbuses, so the Series 2000 features unparalleled connectivity.

InduSoft CEView is a network-ready software package that includes graphics, reports, alarms, programming and all the standard tools used to develop and run operator interfaces for SCADA systems. As the first software released to the industrial market for Windows CE applications it has the advantage of being a proven solution. In addition, InduSoft's newest product, Web Studio, is the most powerful SCADA system with Web Integration. Without any additional tools, Web Studio creates Web and native Windows CE applications in an integrated development

environment. "InduSoft is committed to staying on the leading edge of technology for Windows CE and Web technology. By working with innovative Windows CE hardware manufacturers such as HMW, we can ensure that our customers will have the best in breed solutions for E-manufacturing," said Ernest Roland, president of InduSoft.

"Our objective in announcing this agreement," according to H. Michael Wutz, president of HMW Enterprises, "is to assure our customers that they can order a Windows CE package in which both the hardware and the software are pre-qualified to work together. With InduSoft we know we're offering them an excellent solution."

According to a joint statement from the two companies, users will be able to order the HMW Series 2000 / InduSoft CEView combination preloaded through any of the two company's joint sales channels. Both companies emphasized that they remain committed to the open systems philosophy.
