## **ESA elettronica Adds InduSoft HMI/SCADA Software To Its Industrial Computers and HMI Workstations**

Austin, TX – May 30, 2006 — ESA elettronica S.p.A., a leading European and international supplier of industrial computers and HMI devices, will now offer InduSoft’s Windows-based HMI/SCADA software bundled with their Windows CE-based line of Operator Terminals. CEView enables users to create HMI and SCADA applications tailored to their specific industry and applications.

ESA’s line of Windows CE Terminals includes the VT575CE (7.5” STN display, 640x480 resolution), VT585 (10.4” TFT display, 640x480 resolution), and VT595 (12.1” TFT display, 800x600 resolution), all based on the VIA Eden 400MHz CPU. The Terminals come standard with 128MB RAM, 64MB Flash, 10/100 Base-T Ethernet, 3 serial ports (2 are on the CIB board, an optional communications card), 1 parallel port, and a USB 1.1 port, along with Compact Flash and PCI expansion slots.

“InduSoft’s CEView HMI/SCADA software has been certified to run on our line of Windows CE-based Terminals”, said Marco Ceriani, Product Manager at

ESA. "By bundling CEView with our VT500 series Windows CE Terminals, we can offer our customers a product solution to meet their application needs".

Marcia Gadbois, VP of Business Development at InduSoft, noted that ESA will also provide full support of the HMI/SCADA software. "Not only will ESA be bundling and reselling our software with their hardware, they will provide full software support to their customers," she said. "This is very important to customers all over the world, who often demand local support when buying software products."

CEView is the world's first complete SCADA and HMI package available for the Windows CE platform. CEView is based on InduSoft Web Studio (IWS), a full scale Windows-based supervisory control and monitoring system currently used in over 20,000 installations worldwide. CEView offers most of the same features as IWS, including alarms (on-line and historical), trends (on-line and historical), recipes, scheduler, reports, over 200 communication drivers, OPC (client and server), Web capability (including remote operations via the Web), database interface using SQL commands, remote management capability, math functions, VBScript support and more.

###

#### About ESA Technologies

Based in Mariano Comense, Italy, ESA ([www.esahmi.it](http://www.esahmi.it)) is an international company active into the automation market since more than 30 years in the area of Human Machine Interface solutions. ESA is a leading designer and manufacturer of Intelligent Operator Interfaces and Industrial Computers.

Since 2003, ESA is present in USA as ESA Technology based in Windsor, CA ([www.esatechnology.com](http://www.esatechnology.com)). This is a full American company that provides marketing, sales and technical support in the US.

## About InduSoft

Founded in 1997, InduSoft provides a powerful family of industrial software products for developing applications in industrial automation, instrumentation, and embedded systems for all Microsoft-supported operating systems. Today, InduSoft is developing tools and technologies to empower people and companies to develop graphical interfaces for mobile devices to highly redundant systems. More than 20,000 InduSoft HMI, SCADA, control and data acquisition systems are operating worldwide. For more information, contact InduSoft directly at 877-INDUSOFT (877-463-8763), email [info@indusoft.com](mailto:info@indusoft.com), or visit [www.indusoft.com](http://www.indusoft.com).
