For Immediate Release

Maple Systems to Offer New Ivory Series CE Computers Compatible with InduSoft Web Studio

OI manufacturer offers full SCADA functionality on CE device
Austin, TX — November 17, 2005 — Maple Systems, a leading manufacturer of operator interface terminals, will offer new Ivory Series CE touchscreen computers that can be used with the Indusoft Web Studio software. CEView enables the user to create SCADA and HMI applications tailored to their specific industry.

The Ivory Series is an open platform HMI with the Microsoft® Windows® CE.NET™ 4.2 Professional operating system built-in. Offered in two sizes—5.7" STN and 12.1" TFT—the new Ivory Series computers include USB and Ethernet connectivity and are web-ready. They have a powerful 200 MHz 32-bit RISC processor with built-in graphics accelerator, plus 32 Mb Flash and 64 Mb DRAM as standard features.

CEView is the world's first complete SCADA and HMI package available for the Windows CE platform. CEView is based on InduSoft's full scale Windows-based supervisory control and monitoring system, currently used in over 20,000 installations worldwide. CEView has the same features, including alarms (both

About InduSoft

Founded in 1997, InduSoft provides a powerful family of industrial software products for developing applications in industrial automation, instrumentation, and embedded systems for all Microsoft-supported operating systems. Today, InduSoft is developing tools and technologies to empower people and companies to develop graphical interfaces for mobile devices to highly redundant systems. More than 20,000 InduSoft HMI, SCADA, control and data acquisition systems are operating worldwide. For more information, contact InduSoft directly at 877-INDUSOFT (877-463-8763), email info@indusoft.com or visit www.indusoft.com

About Maple Systems

For over 20 years, the operator interface experts at Maple Systems (www.maple-systems.com) have been designing, manufacturing and supporting high-quality and affordable operator interface terminals for the industrial automation market. They boast a singular focus on the operator interface; decades of experience; and a product line that runs the gamut from multi-functional ASCII and alphanumeric operator interface terminals to sophisticated graphic touchscreen products.
