For Immediate Release

InduSoft and Dynics Cooperation

Industrial PC Manufacturer Offers InduSoft for HMI and SCADA

Austin, Texas — October 4, 2004: InduSoft LLC (www.indusoft.com) and Dynics, Inc. (www.dynics.com) have entered into an agreement to make available a pre-integrated version of the InduSoft Web Studio™ on Dynics industrial computers. The new Dynics product line, DYNiPanel™, will feature Dynics' signature open architecture and modular design, and will be part of the complete product line currently offered to OEM's, distributors and end users worldwide.

The InduSoft Web Studio shipped with Dynics industrial computers is a powerful, integrated collection of automation tools that includes the building blocks needed to develop human machine interfaces (HMIs), supervisory control and data acquisition (SCADA) systems, instrumentation and embedded applications. The software will run on the DYNiPanel fully integrated computers, which are built to withstand the harshest industrial environments and are backed by Dynics' years of experience. Ed Gatt, president of Dynics, explains, "This could very well be the beginning of the end of proprietary HMI platforms in the marketplace."

InduSoft Web Studio runs on native Windows NT, 2000, XP, embedded XP, CE 3.0 and CE .NET environments and conforms to industry standards, such as Microsoft .NET, OPC, DDE, ODBC, XML, SOAP, and ActiveX.

Dynics provides a full line of industrial PCs in both panel mount or rackmount form factors, and designs PCs to fit customer specifications and needs.

Marcia Gadbois, vice president of InduSoft, noted, "Dynics' direct experience with state-of-the-art hardware and software tools make them a preferred source for users who require a custom fit solution for their industrial computing requirements."

ABOUT INDUSOFT

Founded in 1997, InduSoft provides a powerful family of industrial software products for developing applications in process supervision, automation and control for Windows 2000, NT, XP and CE operating systems. Today, InduSoft is developing tools and technologies to empower people and companies to develop graphical interfaces, integrate Web browsers, and take advantage of Internet connectivity. More than 15,000 InduSoft HMI, SCADA, control and data acquisition systems are operating worldwide.

ABOUT DYNICS

Founded in 1997, Dynics offers the most comprehensive, flexible and scalable product line and custom integration service in the industry. Dynics is dedicated to supporting channel partners with a profitable business alliance that includes award-winning products, excellent service and support, and solid tools to meet specific space, environment, or performance criteria. With integration of the InduSoft product, Dynics is poised to provide one stop shopping for all industrial computer needs.
