For Immediate Release

InduSoft Announces Advanced Training for InduSoft Web Studio

Classes are held monthly at InduSoft office in Austin, Texas

Austin, TX – November 15, 2006 – InduSoft announces a new advanced training class: Advanced Training for InduSoft Web Studio 6.1. The advanced course will be held monthly at the InduSoft corporate training center in Austin, Texas.

Both the introductory and advanced courses give attendees rigorous, hands-on instruction over a four-day period. Classes generally consist of eight students and one instructor. Class sizes are purposely limited to provide an optimal learning environment, and a work station is provided for each student. InduSoft instructors are very knowledgeable about InduSoft products and installing industrial automation systems, and are available at all times during the course to ensure each student's understanding and successful application of the software.

Regularly scheduled classes consist of four consecutive eight-hour days. Normally, on the fourth day, the morning is spent in class and the afternoon will be dedicated to allowing students to finish their sample applications and ask questions. Classes start at 9:00 a.m. each day and end at approximately 5:00 p.m.

Classes are scheduled for the following dates in 2007:

February 5-8

March 12-15

April 23-26

May 21-24

June 25-28

July 23-26

August 20-23

September 24-27

October 22-25

November 27-30

December 10-13
